

Year 3

Dear Parents & Carers,

Year 3 has been getting brighter and brighter this week with this term's science topic, 'Light and Shadow'. The children have been investigating how light travels in straight lines. In English we have begun writing our own stories about The Egg by Mark Robertson, incorporating all the descriptive writing skills learned last week. In Maths we have begun to subtract by counting on using a number line.

The children met with their year 5 buddies this week and enjoyed having an extra playtime to get to know the older children.

Homework Reminder

This week we would appreciate if you could cover your child's English homework book, Science book and Our World book with clear self-adhesive tacky back.

Before covering the Science and our World book we would like the children to decorate the front cover with pictures or drawings that link to our class topics. These can be drawn by hand or cut out from magazines, print outs from websites etc. and stuck onto the books.

Science topics: light, magnets, plants, rocks and soils, animals and humans.

Our World topics: The UK, volcanoes, map skills and the Romans.

Spelling

Please learn week 3 spellings for dictation on Friday 6th October.

Many thanks

Year Three Team ☺

Date Reminder

October 20

Half Term 3:25 pm Finish

November 22

Yr 3 trip to the cinema

Announcements

Parent helpers needed!

Year 3 need parent helpers to listen to children read on the following afternoons from 2:45 – 3:15. Please let your child's class teacher know if you are able to help.

Elm- Monday and Thursday

Beech- Monday and
Wednesday
