Activity Week Programme

WEIRD SCIENCE! – Brand New for 2018!

Every day on this four-day science activity camp is a great mix of exciting demonstrations, hands-on experiments, team games and fun quizzes. Over the week your child will take part in 30+ science activities and demonstrations including.

Day 1> Deep Science!

The Deep – Travel down through the ocean zones and discover the mysteries of The Deep in an ocean zone bottle.

Jaws! – 'Meet' an ocean apex predator and make their food chain.

Beyond the Sea – Oil spills happen too frequently in our oceans, we learn how difficult they are to clean up.

Day 2> Blow Me Away!

Blow Wind, Blow – The wind moves at different speeds from a gentle breeze, to a hurricane. We build an anemometer to measure wind speed.

Renewable Energy – I'm a Big Fan – We look at powerful air and harness some to power our own turbine.

Flying without Wings – it's not just things with wings that fly! We make a spinning flyer from some unusual things.

Day 3> Rainbow Research!

Mix It Up – We learn about primary, secondary and tertiary colours, and mix our own colour wheel.

Rainbow Connection – We split visible light into the rainbow spectrum by making a spectroscope.

Hall of Mirrors – Light travels in straight lines, but what if you reflect it? We reflect on what happens and make a mirror sculpture.

Day 4> Weather Madness!

Mr Blue Sky – There are many different types of clouds, we make a cloud viewer and learn what the different types of cloud mean for the weather around us.

Twister! – We examine one of the more extreme weather systems and find out what makes a tornado twist and make our own tornado in a bottle.

Let It Rain – How is rainfall measured? We make a rainwater gauge.

Everyday is concluded with **The Fun Zone** – where we recap the activities with quizzes and challenges designed to reinforce the day's learning.

The No.1 Science Activity Holiday Camp
For All Boys & Girls Aged 5-12 Yrs
Runs Every School Holidays - Including Half-Terms
