

At **Technokids** children learn how to use computers to make their ideas come to life! We bring **Laptops, iPads or Programmable Robots** into school & teach a variety of courses which develop digital literacy, creative learning & coding skills. It's great fun!

Our fun learning sessions are equally popular with **both boys and girls**. Joining Technokids is a fantastic way for them to develop their computing skills in a social context and get a **great headstart in digital literacy & computer science**. Lessons are supplemented with a range of educational apps and activities, focusing on **logical reasoning & creative design**.

We believe that for children to **genuinely develop** in computing they need to use a **wide range of programs, devices and platforms**. We aim to equip children with the confidence and skills needed to **understand, make and create technology!**
