

Year One

Dear Parents,

What a busy week we have had! Lavender Class loved making mud faces in forest fun and everyone is settling into their routine well.

Maths

In Maths we have been practicing counting forward and backwards from different numbers and finding one more or less than a number. We have used number lines and objects to support our learning.

Science & English

We have been learning the names of different parts of our body, drawing around ourselves and labelling pictures. We made faces using different materials including pipe cleaners, screws and wool. Next week we will be learning about skeletons – how many different bones can you name?

Phonics

Recapping Phase 3 sounds – ff, ll, ss

Deputy Head Teacher's Award

Notices

Please make sure that your child doesn't come into school wearing any jewellery. If they must keep their earrings in, please cover them with a plaster or micro pore tape.

We are collecting plastic milk bottle tops, small junk modeling, old birthday cards and magazines. Any donations gratefully received.

If your child was awarded Diamond Work today, you'll be able to see it on the school website on Monday.

Remember to encourage your child to read to their reading pet every day and sign in their book to let us know how they are getting on. Once you have signed to say they have finished the book, they need to put it in the book box in the morning so they can change it that day. Thanks ☺
