

Home Learning

We have been learning about lots of different numbers and shapes in Daisy Class. Can you go on a looking walk to see if you can spot any shapes or numbers around you? These could be inside your home, door numbers, street signs...anything! Please bring in some photographs if possible and we can add them to our display!

People who help us

We have continued our new topic this week 'People who help us' We have learnt more about the many different people who help us and our veterinary surgery was such a popular success that we have expanded to a doctors surgery to treat people too. We have been very caring and have treated lots of poorly animals and people.

Forest Fun

This week in Forest Fun we had a go at making pictures outside using natural objects inspired by Andy Goldsworthy. Please remember to bring your child to school every Wednesday in waterproof wear to maximise our Forest Fun time! Don't forget to bring a change of clothes, shoes and a spare bag too.

Daisy Class

Number of the week

Our number of the week this week was **number 8!** We loved meeting a new numberblock and exploring the number. We did lots of counting. We counted cubes, gems, animals, numicon and more!

Sound of the week

This week we learnt our new sound '**t**'. We thought of lots of words beginning with '**t**' (tiger, tennis, tractor, teddy, table, television!) and even spotted them in our names! We learnt a new action, a new song and had a go at writing '**t**'!

Tapestry

Since the Autumn term we have been using Tapestry to add lots of the exciting things that we have been busy doing in Daisy Class. Make sure you have signed up and are checking it regularly so you don't miss out on fun Daisy moments! Please speak to Mrs Channing if you need any help accessing Tapestry.
