

## Year 4

Dear Parents & Carers,

This week our maths focus has been on equivalent fractions. Please look on Mathletics for any activities that will support your child's understanding as most of the year group have found this work quite challenging!

In English, the children are enjoying the story of Thor and his Stolen Hammer. We have acted out the story and recapped our knowledge of speech punctuation.

Please take an opportunity to look through your child's English Book this weekend. We are sure you will like reading the writing we completed on Secrets of a Sun King. **ALL books to be returned on MONDAY 16<sup>th</sup>.**

As part of our rivers topic, we considered the importance of the water cycle. In science, the children had great fun completing a classification chart for 5 Liquorice Allsorts!

Year 4 Team ☺

### Homework Reminder

Home learning grid for Spring 2 will be available on the school website. Whilst the enrichment activities are focused on rivers, please remember to keep up with the non-negotiables.

Next term, all children in Year 4 throughout the country, will take an on-line multiplication test comprising of 25 questions (all multiplication based – no division). To help them practise and become familiar with the test, please look at this web link <https://urbrainy.com/mtc>. Having tried it at school, there does not appear to be a need to subscribe or pay just to access the test.

### Date Reminders

**18<sup>th</sup> & 19<sup>th</sup> March**

Parent Consultations
