

## Year 6

---

Dear Parents and Carers,

The week ended on a high note with a circus themed Funky Friday. The children had opportunities to learn how to hula hoop, spin plates, juggle, walk on stilts and even ride a unicycle. The day finished with everyone having an opportunity to perform a group routine in front of their friends. Videos and pictures will be posted on the Google Classroom shortly.

The majority of the children also visited their secondary schools this week, which added to the excitement. We hope they enjoyed meeting new people and some of their teachers.

---

### English

This week our main focus has been on the production of Macbeth. We also found out about collective nouns and made some fun discoveries: a bask of crocodiles, a smack of jellyfish and a pandemonium of parrots to name a few.

### Maths

This week has been a very practical and hands-on introduction to algebra which the children have enjoyed.

### Foundation Subjects

The children had an interesting zoom meeting with Professor Mark Maslin from UCL who specialises in Climatology. He talked to the children about his studies in climate change and also about how he had chosen his career and field of study. His book, How to Save Our Planet is described as 'Punchy and to the point' when it comes to the issues of climate change. Thanks to Mrs Khan for organising this.

## Notices & Reminders

You have now received notification of all the Year 6 events until the end of term. Next Tuesday, **13th July**, is Dragon Boats at Albany Outdoor Centre. Please check out your times and the clothing requirements sent to you in our earlier communication.

Library books must now be returned. Please ask your child to bring any books they have into school and put them in the box in their classrooms.

We will be making props for our production on Monday **12th July** - the children may bring in cardboard etc. to help with this project.
